

# Intuit QuickBase

Business Agility and Team Productivity for your Enterprise

“QuickBase gives us a level of speed and flexibility in automating key business processes that we can’t get anywhere else.”

Jim Giza, Director of Technology  
Kayak.com

## One platform for unlimited team productivity applications.

**Team productivity.** QuickBase lets teams quickly create custom applications to match their unique business processes – easily connecting people and information.

**Business agility.** And as your organization grows, the Web-based QuickBase platform keeps costs low while maintaining excellent scalability.

More than half the Fortune 100 use QuickBase to make their teams more productive.

PMO eliminated 18-24 days of meetings per person per year.

2,000 fewer hours spent managing SOX compliance process.

115 apps and saved \$7.5 million in development cost.

# Intuit QuickBase

Business Agility and Team Productivity for your Enterprise

There are many reasons that QuickBase is the right platform for your enterprise.

## Access: Wherever, Whenever

The QuickBase platform serves as a central Web-based hub for all your business-critical information. Teams can work and collaborate effectively across the campus or across the globe.

## Easily Customized

Team members can develop their own applications in response to their specific needs. QuickBase applications are easy to create and offer almost infinite possibilities for data collection, presentation and analysis.

## IT Friendly

QuickBase's centralized enterprise service allows for monitoring of data access and usage, support for password policies and other security safeguards.\* When users develop their own applications, IT resources can be deployed elsewhere.

## Pay As You Go

QuickBase customers pay based on number of users and data space required. With our flexible pricing, you only pay for what you need.

## Real Time

Your online database updates whenever a team member adds or modifies a record. Users can view reports and make decisions using accurate, up-to-date information.

## Supported

Unlimited support model for all customers; Enterprise plans include premium SLAs and assistance with enterprise installation and administration.\*

## Proven Success

For over ten years, teams at thousands of companies, including over half the Fortune 100, have used QuickBase to manage their business processes.

## ROI

Over 50 of the Fortune 100 have realized substantial cost savings with QuickBase, while simultaneously enhancing their teams' ability to solve problems and take advantage of new opportunities.

## Scalability

With QuickBase, you never have to worry about being one server short - sudden changes in capacity needs are no problem. As your data needs grow, QuickBase can grow with you.

## Accessible

Custom roles and permissions determine each team member's level of data access, so information can be safely shared internally, along with customers and partners.

## Cost Effective

One platform with unlimited applications included in the price reduces total cost of ownership.

- Custom applications
- Project management
- CRM
- Sales management
- Compliance processes
- and more...

## Integration with ERPs

The QuickBase API allows you to integrate QuickBase with existing infrastructure. Securely connect the data you need across any number of systems.

\* These features may only be available with the QuickBase Enterprise edition. Not all features are available with all QuickBase plans.
